

Crack WiFi WPA2 via Aircrack-ng

- Aircrack vs. WPA2

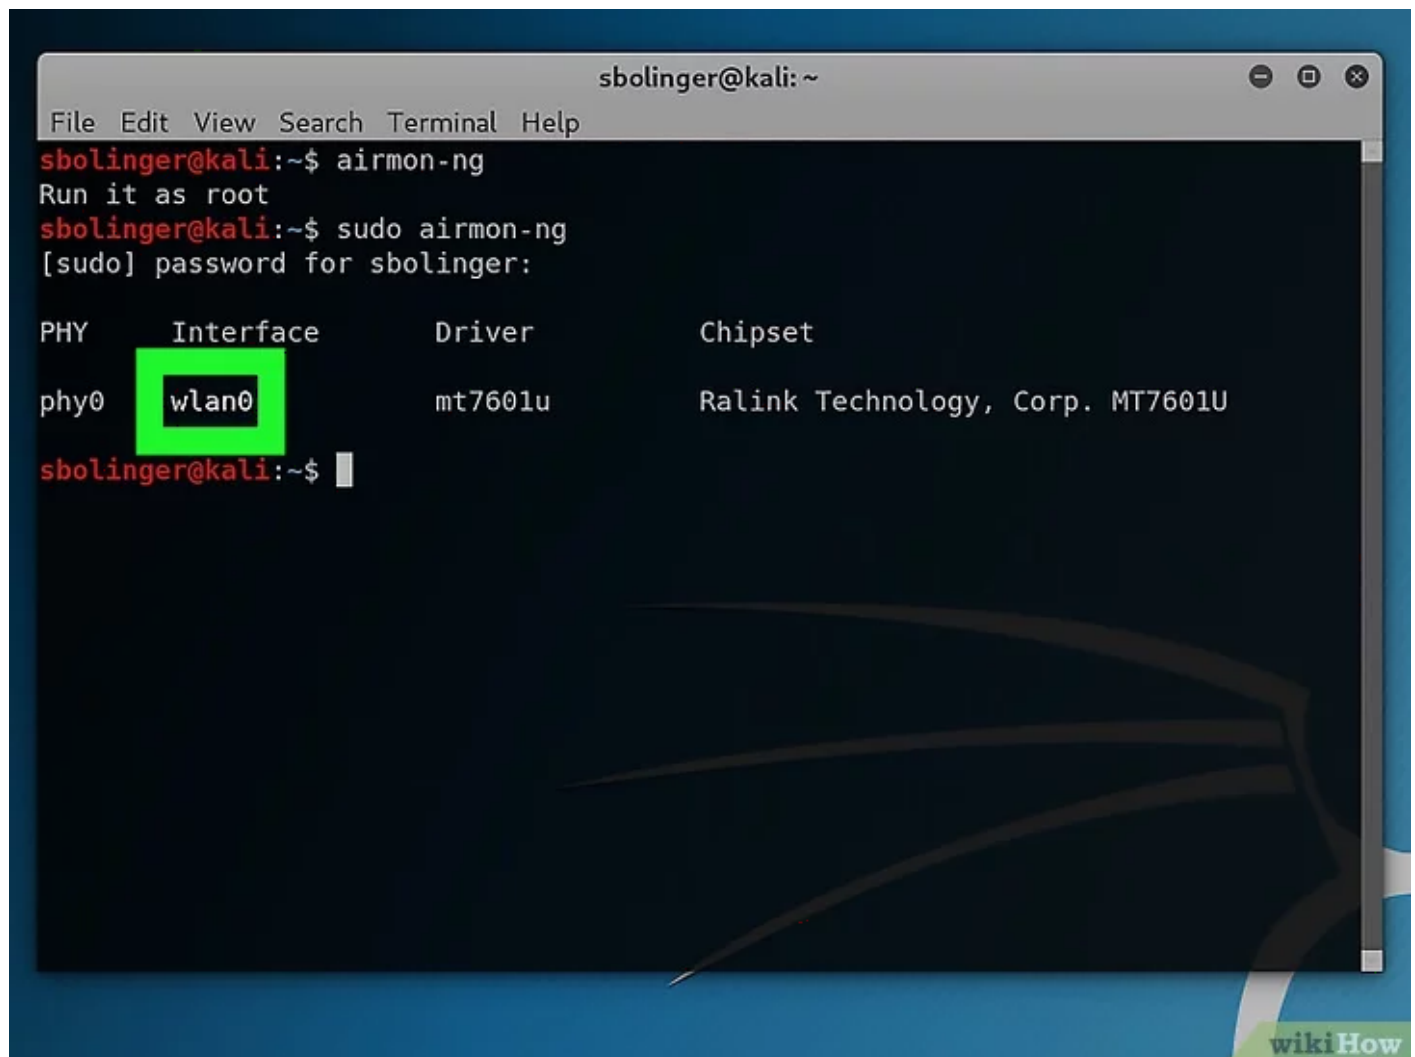

Aircrack vs. WPA2

Install Aircrack

```
sudo apt-get install aircrack-ng
```

Search for Wlan Adapters

```
sudo airmon-ng
```

```
sbolinger@kali:~$ airmon-ng
Run it as root
sbolinger@kali:~$ sudo airmon-ng
[sudo] password for sbolinger:

PHY      Interface      Driver      Chipset
phy0     wlan0          mt7601u     Ralink Technology, Corp. MT7601U
sbolinger@kali:~$
```

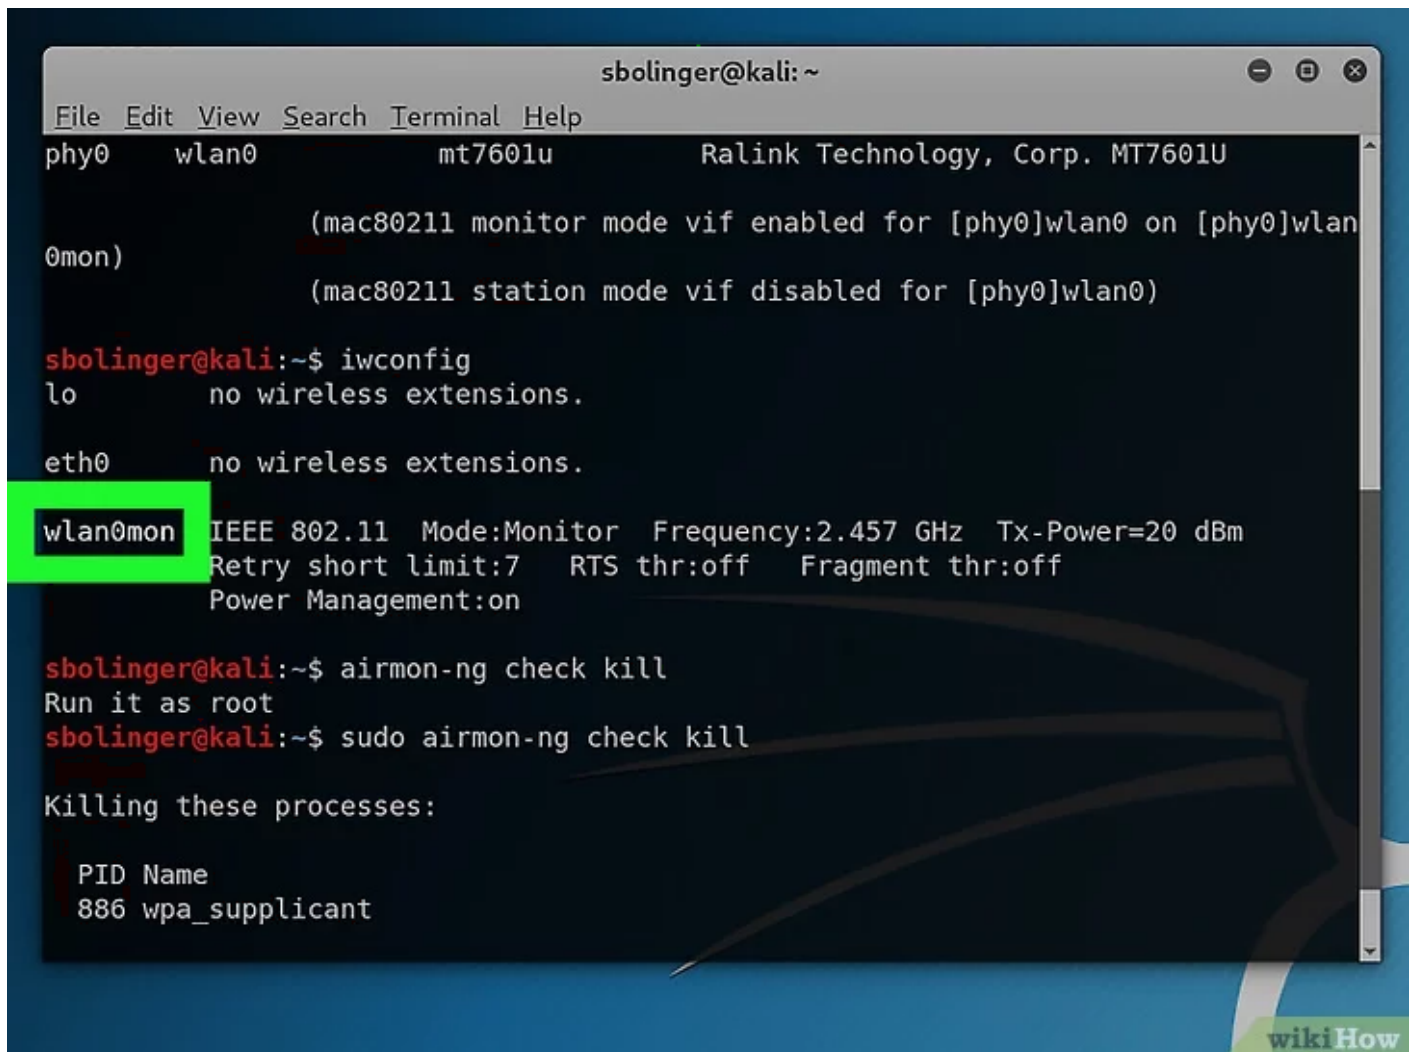

Enable Monitor Mode

```
sudo airmon-ng start wlan0
```

Kill all previous airmon processes

```
sudo airmon-ng check kill
```

Look out for the wireless monitor device

A terminal window titled 'sbolinger@kali: ~' with a menu bar (File, Edit, View, Search, Terminal, Help). The terminal shows the output of 'iwconfig' for phy0, wlan0, and eth0. wlan0 is in monitor mode. Then, 'airmon-ng check kill' is run, showing it should be run as root. Finally, 'sudo airmon-ng check kill' is run, resulting in the killing of the wpa_supplicant process.

```
sbolinger@kali: ~
