Apt-usage

Install package

`apt-get install <packagename>`

search package

`apt-cache search <packagename> or <packagedescription>`

remove package

`apt-get remove <packagename>` to remove but letting configfiles untouched

`apt-get purge <packagename>` to remove with configfiles and without checking dependencies

`apt-get autoremove` remove unneccesary Packages

Update Package-Cache

`apt-get update`

Upgrade Packages

and (without installing additional) dependencies

`àpt-get upgrade`

can lead to breaking. To install needed dependencies do:

```
apt-get install -f
```

Upgrade whole OS

```
apt-get dist-upgrade
```
