

Install Software in Template using proxy

wget proxy

Issue in Terminal:

```
https_proxy=http://127.0.0.1:8082/ http_proxy=http://127.0.0.1:8082/
```

Then you can

```
flatpak install xyz
```

or

```
sudo extrepo enable xyz
```

Clone git in template

```
git config --global http.proxy http://127.0.0.1:8082
```

then you can

```
git clone xyz
```
